

line 17, after "appendix" insert ~~was~~ filed in U.S. Patent Application Serial

A²
No. 09/036,236 filed 6 March 1998, and---

On Page 6, after "DETAILED DESCRIPTION OF THE INVENTION" insert:

--As shown in FIG. 1, the invention may, in general, display the following features,
in, for example, the following order:

Content Request and Original Authorization 1

Token Request & Profile 2

Token Return 3

Returned Content & Token 4

Content Request with Token 5

Validate Token Request 6

Validation & Profile Return 7

Content Return 8

Log Access Record (logd) 9

In one preferred embodiment, as shown in FIG. 2, the invention may display the
following features:

HTTP initiate session request 10

UDP request to obtain token 11

UDP return of token 12

"Tokenized" page of header info via HTTP 13

HTTP request (with token) 14

UDP token validation request 15

UDP relay token auth request 16

UDP relay return of token OK with user service class and demographics 17

UDP return of token OK with user service class/demographics 18

HTTP return of requested resource (w/URLs tokenized) 19

HTTP return of log (access) report 20

HTTP relay of log (access) report 21

Email Session report 22---

In the Drawings:

Applicant proposes to renumber the features shown in FIG. 2 in accordance with the above amendment to the specification and in accordance with the attached sketch in red, APPENDIX A.

In the Abstract:

Kindly delete the original abstract and substitute the abstract provided as APPENDIX B.

In the Claims:

Please cancel original Claims 1-34, and add new Claims 35-41 as shown in APPENDIX C.
